

“Ensuring Food Sovereignty Futurisms with Youth Centered Heartwork”

Electa Hare-Redcorn

Discussion Prompts

1. In the lens of ag and youth development- what are ways to strengthen our families, tribes, and the cultural protocols that protect indigenous community health?
2. What are two ways to include youth programming into health policy engagement?
3. How do we highlight the Western youth development lifespan in a cultural crosswalk with Traditional Ecological Knowledge and seasons of growth?
